26 June 2014

Dear Parents and Carers,

During Term 3, K-6 teachers will be implementing the Bounce Back Program, a highly evaluated resilience program for students. As with Focus on Reading, the strategies and skills being taught will be consistent across all stages. We hope that once all students have common strategies and common language, to deal with incidents that arise at school, they will become more resilient and feel more confident in their own ability to cope.

Teachers at Connells Point Public School are focused on building these skills within our students and it will build upon, and complement, our Peer Support program being implemented in Term 2.

On Thursday 24 July at 6pm staff members would like to show you what this will look like in classrooms, with a session outlining the program and explaining what your children will be doing in class and how you can complement this at home. We would greatly appreciate your support at home.

If you would be interested in attending this forum could you please indicate below and return to your child's classroom teacher.

Mrs Therese Corben  
Relieving Principal
